

Logging In to LYNX

Security Note

To access LYNX, you must have the following permission set to **Yes** in [Group Administration](#):

Tools Access: 4.0 *Access to LYNX Tool*

To sign in to LYNX, first sign in to 25Live. You can use the same credentials to authenticate to multiple applications at once.

1. Sign in to 25Live Using Your User's Credentials
2. Open the **More** Menu in the Upper Right
3. Tap the **LYNX** Link in the "Go to Tool" Section

Image: LYNX is accessible through the 25Live More menu.

Image: The link to LYNX is under the Go To Tool section of the More menu.

Security Requirements

If your institution has a single LYNX instance, an administrator must give you proper permissions to see the LYNX link

in the "Go to Tool" menu in other Series applications.

If your institution has multiple LYNX instances (such as for different campuses or schools within a district), you will need to reach out to Series Technical Support (support@collegenet.com) for help with LYNX user creation to see the link in the menu.

The login experience for LYNX will be the same for both user types after permissions and/or setup is complete.
