Each resource in 25Live has a details page with its instructions, notification policy, inventory, event calendar, audit trail, and more.

The top section shows the resource name. Use the star icon ( ☆ ) next to the resource name to add it to your favorites.

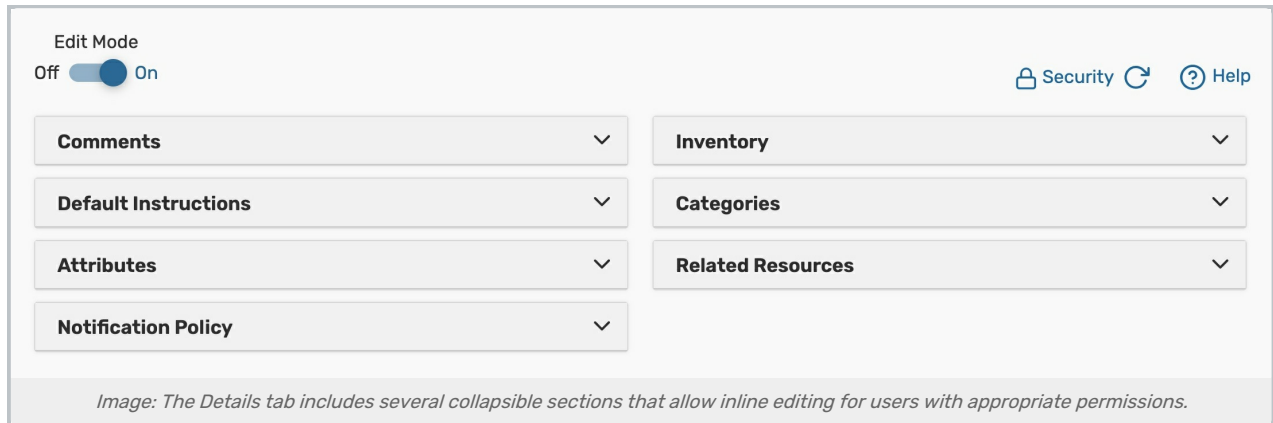

## Resource Tabs

Below are descriptions of each of the resource details tabs and their uses. Please note that what you are able to view on this page will depend on your security settings and configurations. If there are settings you think you should be able to see or edit, please contact your 25Live Administrator.

## Details

The Details page shows all of a resource's data including its instructions, attributes, notification policy, and more.

- **Edit Mode** - Set the toggle to **On** to enable [inline editing](#).
- **Security** - This link sends you to the [Object Security](#) configuration page for this resource in Group Administration.
- **Refresh** - You can refresh the summary using the refresh icon  in the upper-right of the summary area.
- **Help** - Press to be moved to the KnowledgeBase.

The resource information is available in collapsible sections:

- **Comments** - Administrative comments about the resource.
- **Default Instructions** - Generally includes resource rental policies or other instructions.
- **Attributes** - Custom resource data fields, such as the last time the resource was serviced or an image of the resource.
- **Notification Policy** - Lists the policies that determine the approval type, the length of time that approval is required within, and who should be notified when the resource is requested or booked.
- **Inventory** - The stock total for the resource.
- **Categories** - Custom descriptors assigned to a resource for purposes of grouping, retrieving, and reporting.
- **Related Resources** - Resource inter-dependencies.
  - **Also Assign** - Other resources that are also automatically assigned to an event when this resource is assigned.
  - **Substitute For** - Resources that will get assigned to an event instead of this one. (Such as in cases where a resource temporarily unavailable).
