

## LYNX Settings – Continuing Education

These settings can be found in the "Continuing Education" area of LYNX's **Configuration - Settings** area.

Setting	Notes
<b>Identify CE Sections</b>	LYNX can flag events in 25Live using specific identifying markers, either a special event type or an event category. This is intended for use with continuing education sections.
<b>Default CE Event Category</b> <b>Default CE Event Type</b>	<p>Select either an event type or an event category to use in 25Live, depending on the selection chosen above.</p> <p>If you choose an event type, it will be used instead of the default event type or any translation rules specified in <a href="#">LYNX Settings - Events</a>.</p> <p>If you choose a category, it will be used in addition to any other categories added to the event, without replacing anything.</p>
<b>Recognize CE Sections by Subject Code</b>  <b>Recognize CE Sections by Section Number</b>  <b>Recognize CE Sections by Term Code</b>  <b>Recognize CE Sections by Subterm Code</b>  <b>Recognize CE Sections by Academic Career</b>  <b>Recognize CE Sections by Credit Hours</b>	<p>These settings determine how LYNX knows which sections to identify with the event type or category chosen above.</p> <p>Different schools use different methods to indicate their continuing education programs, so a variety of options are presented here. You will likely only need to configure one of them, but if you make more selections then a section will be recognized if it meets at least one of them.</p>
