

Selecting an Event Configuration

Security Note

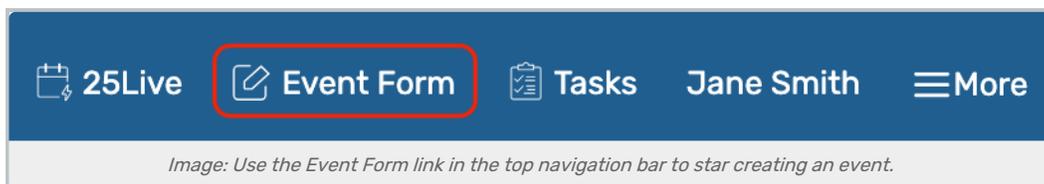

To access Master Definitions System Settings views, your 25Live user must have the following security permissions set in [Series25 Group Administration](#): Admin: 17.0 *Update User Group Preferences and Configurations*.

If you would like your permissions changed, contact your 25Live administrator.

25Live allows users with administrative security permissions to test and use different [Event Form configurations](#).

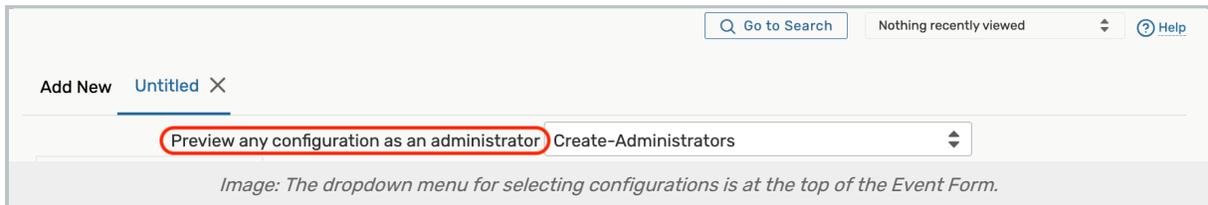

How to Select an Event Config

1. Open the Event Form

Open the **Event Form** using the link in the [top navigation bar](#).

2. Select a Configuration

Use the dropdown to select the configuration you want to view or test.

Security Note: Be Sure You're Logged In With an Administrative Account

To access the Select any Config dropdown, your 25Live user must be a System Administrator (-1) security group. If you do not have access you think you should have, contact your 25Live administrator.

3. Optionally Return to Your User's Default Configuration

You may wish to switch back to your own default to avoid later confusion.
