Viewing Snapshot Data as a Table

The **Tables** page in X25 Analytics lets you browse all event and location data within a single snapshot. You can filter the data according to predefined data filters and zoom in on specific groupings such as organizations, buildings, and breakpoints.

How to View Snapshot Data as a Table

1. Select a Project and Snapshot

Use the **Select** link in the left-side menu to choose a project and snapshot.

2. Go to the Metrics Table View

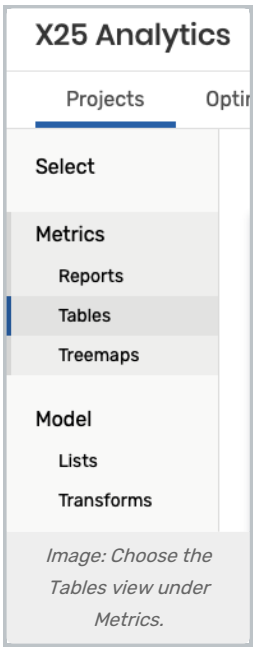

Image: Choose the Tables view under Metrics.

Under the **Metrics** heading in the left-side menu, choose **Tables**.

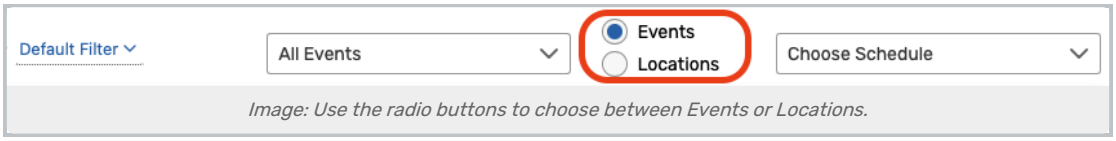

Image: Use the radio buttons to choose between Events or Locations.

You can then choose between:

- Viewing Events Tables
- Viewing Locations Tables
