

About X25 Analytics

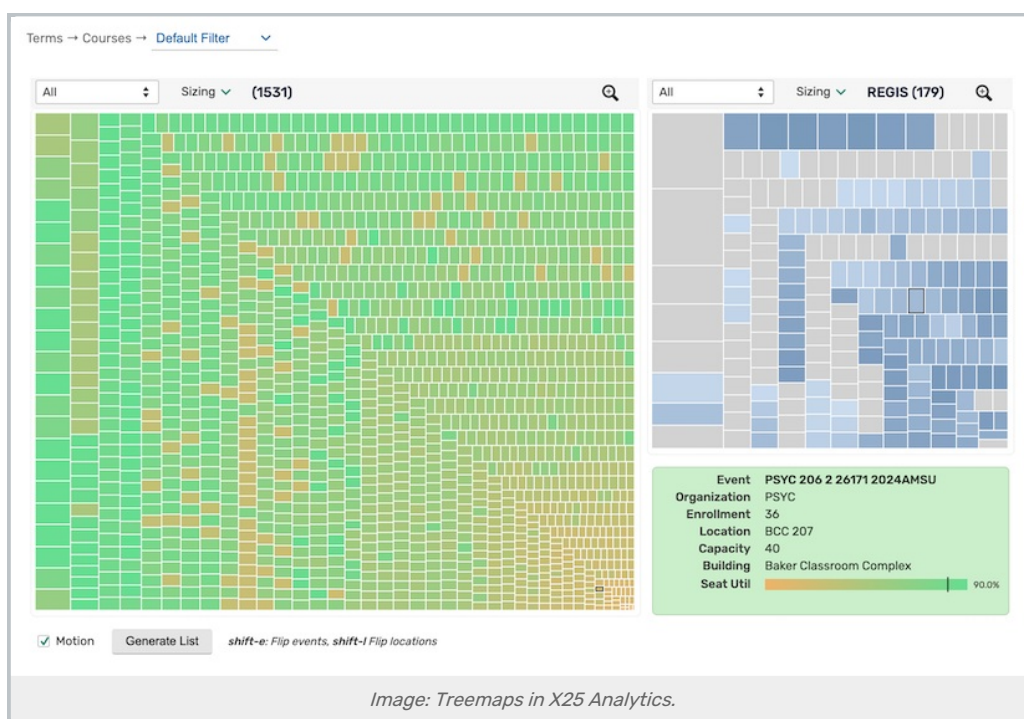

Features and Benefits

- ✓ Generate data to support your scheduling decisions as well as reports required by your state or trustees or needed to position your institution to obtain funding
- ✓ Demonstrate where more space is needed and where construction, closures, or reallocations may be possible
- ✓ Identify peak time slots and provide departments the analysis and guidance to meet the academic needs of departments, faculty, and students
- ✓ View and compare results for critical periods, such as drop/add date, end-of-term and census data
- ✓ Compare levels of demand among venues to identify where the need for new facilities is greatest
- ✓ Pinpoint room utilization and scheduling patterns that identify problems and opportunities to improve the use of each location
- ✓ Customize parameters and scope of analytics to evaluate how your specific location inventory is meeting needs

How does X25 fit into Series25?

You can export data to X25 for analysis. With the X25 data analytics and modeling tools, extensive data variations can be studied under a variety of scenarios, including building and schedule changes. You can then run your chosen scheduling scenarios through the Schedule25 Optimizer for optimal placement.

We Love Your Feedback

We would love to get your feedback about what you like, don't like, or any problems you encounter:
