

03/10/2022 – 25Live Pro

Last Modified on 10/14/2022 12:13 pm PDT

- New ability to bulk edit [location](#) hours and layouts, and bulk delete [events](#)
 - The "From" field in an [Event Save Email template](#) can now be edited
 - A [permissions update](#) to Event Save Email settings allows users that aren't in the System Administrator (-1) security group to edit Event Save Emails
 - *Additional Fixes and Improvements*
 - Custom attributes have increased text field space
 - The Always Share toggle is now greyed out when the Edit Mode toggle is set to "no"
 - When inline editing a Requirement's comment or quantity, users can now click outside of the field to save a new value, without having to click "Save"
 - Improvements to Welcome Message functionality for SSO users
 - Corrected permissions issue for users with adequate permissions being unable to edit the sort order in System Settings > Master Definitions > Event Types
 - Fixed issue where comment and quantity fields would show up erroneously in the Event Form for Requirements that shouldn't have those fields
 - Requirement quantity value is no longer lost when requirement comment is entered
-
