

Interactive Report Designer – Windows Error 2

Last Modified on 04/27/2022 3:26 pm PDT

Example Error Text

LaunchAnywhere Error

Windows error 2 occurred while loading the Java VM

Description

- When installing Interactive Reports Designer, you see the error above.
- This message may occur if you install only a 64-bit JDK.

Steps

- Ensure you have installed a 32-bit JDK.
- If you have installed a 32-bit JDK and the issue persists, ensure there is a java.exe in your C:\Windows\SysWOW64 folder.
 - If this folder does not have a java.exe file, copy the file from your Java installation.
- Consider checking the system PATH variable:
 - Right click Computer >> Properties >> Advanced system settings >> Environment Variables... >> Path
 - Click Edit...
 - Ensure the Java entry points to the intended Java\bin directory
 - Example:
C:\Program Files\Java\jdk1.8.0_45\bin
