

LYNX-APP 1.2.0

Last Modified on 05/09/2022 11:25 am PDT

The LYNX-APP applies to all database (non-API) versions of the LYNX Interface (Banner, Campus Solutions, Colleague, and Universal) and can be installed on either a Windows or Linux operating system. The latest version of the Lynx app can be found on our [Software Downloads](#) (*login required*) page.

Updates included in 1.2.0

- Supports Java 8 and Java 11
- Supports ojdbc8.jar
- Comes packaged with jasypt-1.9.3 for encrypting credentials

Update History

Version 1.1.2

- Windows was already a supported platform for the LYNX-APP. Now Linux is supported, as well.

Version 1.1.1

- Supports SQL Server JDBC for LYNX Universal and LYNX Colleague
- Supports the use of a proxy server

Version 1.0.6

- Upgraded Java Spring Boot and Java Spring to the latest versions: 1.5.2 and 4.3.7, respectively
- Handled *Exception java.lang.AbstractMethodError*, which occurs when the customer server is using an older version of ojdbc
- Displays special Unicode characters properly

Version 1.0.5

- Fixed issue with LYNX_P_HIST_CLEANUP timing
- Improved recovery from network disruptions between LYNX-APP and CollegeNET
- Added validation of CRON expression (loaded via LYNX WS). If the expression is invalid, LYNX-APP will use a default one
