

05/26/2022 – X25 Analytics

Last Modified on 05/27/2022 12:01 pm PDT

- **New** ability to define [Standard Schedules](#) within Section Analytics, including those defined from the term and filter criteria chosen on the “Select” page
- **New** ability to apply Standard Schedules to the [Demand by Time report](#)
 - Compare compliance with non-compliance
- **New** [Section Analytics](#) filter criteria: **College Code**

Additional Fixes & Improvements:

- [Settings](#) tab moved to left-hand navigation
- Backend errors no longer display when running the Optimize step of an [Optimizer](#) run
- Bars on charts no longer disappear when using half-hour time values in the [Default Data filters](#)
- When no data filters have been selected for a snapshot, the filter label now reads “Default Filter” rather than “No filter defined”
- Fixed meeting pattern sorting in [Time Mappings](#) that caused the incorrect meeting pattern to be added from snapshots
- Filter criteria now displays in Section Analytics when it has been chosen in the Select tab
- Improvements made to search-based snapshot processing
- Various small UI improvements

Demand by Time Report:

- Fixed issue where Critical Range demand wasn’t included for time increments under-an-hour long
- Corrected issue where clicking could cause unexpected zooming

[Traffic Map Report:](#)

- Report now correctly functions as a Story
- No longer displays the “change addresses” button when presented as a story
- Corrected the display and save issues when viewing and editing addresses in the form
- When there is not enough data to run the Traffic Map report, the error message now offers the following troubleshooting recommendation: “No classes found. Check dates, location reservations, building data, and/or any filters.”

[Locations by Time Report:](#)

- Corrected issue where the location utilization time slots are not reflected correctly on the chart
- Chartlets are now omitted if they have no data
