06/02/2022 – 25Live

Last Modified on 06/22/2022 9:45 pm PDT

- Added "Document Type" when creating new items in Document Management to allow new template variables per reservation for reservation-based documents
- Expanded access to bulk editing for locations, resources, and organizations to some Administrative options in the Series25 Group Administration tool outside the (-1) group
- Work continues to add new abilities to edit event type hierarchy in 25Live (rather than the Administration Utility) including "Manage Cabinet" and "Manage Folder"
  - *Note: Part of the effort to migrate away from the Admin Utility. We will end support for the Administration Utility this summer.*
  - *Also, please review our recommended cabinet and folder structure best practices.*
- Ensured saving an Event Form doesn't present multiple notification messages
- Security changes throughout the application to ensure that (with proper permissions) abridged columns show for master definitions, inactive event roles display, and other fixes
- Prevented event quota issues for users in different time zones when using additional event times (pre-, post-, etc.)
- Made sure organization ratings are enforced and clarified messaging (based on Feature Upvote request)
- Security changes throughout the application to ensure that (with proper permissions) inactive event roles display, and other fixes
- Updated report action labels to be more consistent across views and applications
