

Updating the LYNX application.properties File

If your SIS is moving to a different server, you will need to update the LYNX app application.properties file on your application server. To do this, complete each step below.

Note

The following instructions do not apply to API versions of LYNX that do not use a locally hosted Java app.

Stop the LYNX app from running

On a Windows server:

- Open the Windows **Services** app
- Right-click on your LYNX app service
 - Typically, this is named **LYNX-APP**, **LYNX-APP-PROD**, or **LYNX-APP-TEST**
- From the menu, select **Stop**

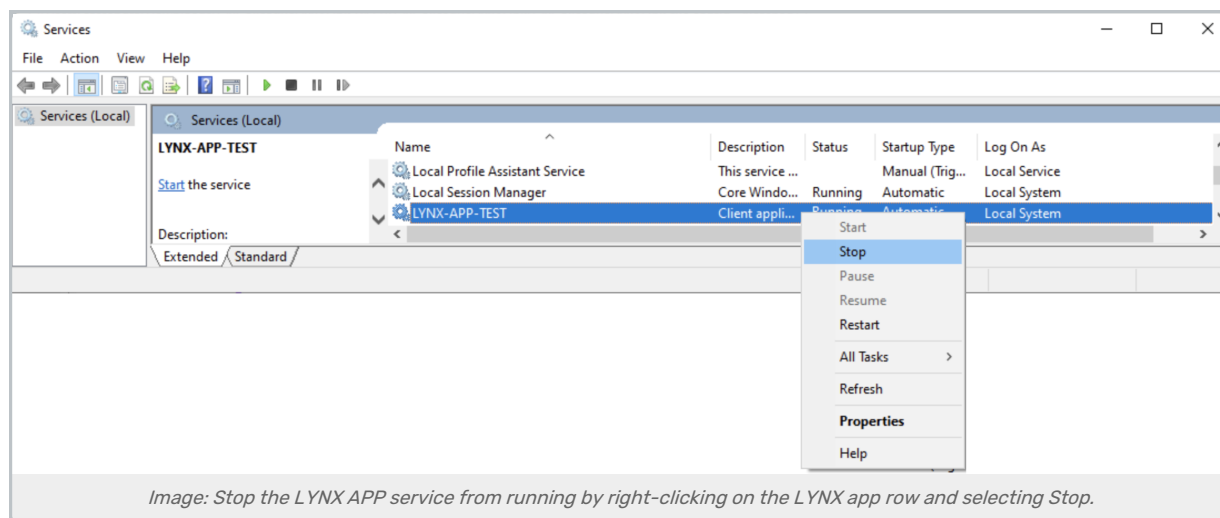

Image: Stop the LYNX APP service from running by right-clicking on the LYNX app row and selecting Stop.

For Linux instructions, see the 'Test Execution of Background Scripts' section in [LYNX-APP Installation for Linux](#).

Locate the application.properties file

The default install location for the LYNX **application.properties** file (on Windows) is:

- **~LYNX-APP-TEST\Config**
AND
- **~LYNX-APP-PROD\Config**

Update the db-url value in the "SIS DATABASE" section of the file to reflect your new SIS server location

Remember to save your changes.

To see an example of the Microsoft SQL Server database connection string, see the **Update Configuration** section of [LYNX-APP Installation for Windows](#).

```
11 #####
12 # LYNX WEB SERVICES #
13 #####
14 # local target
15 lynx-url-prefix=https://lynx.collegenet.com/lynx-ws/sis/data/
16 lynx-url-suffix=/run/
17 lynx-login-service=auth.xml?cmd=login
18 # lynx-instance-id=support
19 lynx-username=interface
20
21 # Encrypted password, if used, must be surrounded by ENC()
22 # lynx-password=ENC(SkuEuro1bbiEJUKGsQaeEfoBJXICn6Qr)
23 lynx-password=example_password
24
25 # Optional proxy server
26 # proxy-address=HOSTNAME:PORT
27
28 #####
29 # SIS DATABASE #
30 #####
31 db-url=jdbc:oracle:thin:@//example.server.com:port/example.server.com
32 db-username=lynx_user
33
34 # Encrypted password, if used, must be surrounded by ENC()
35 # db-password=ENC(AlJjLsjpcydj3EmVJ70Vyw==)
36 db-password=example_password
37
38
```

Start the LYNX app

- Open the Windows **Services** app
- Right-click on your LYNX app service
- From the menu, select **Start**

See the **Update Configuration** section of [LYNX-APP Installation for Windows](#) for more detail about the application.properties file.
