Last Modified on 06/28/2022 2:41 pm PDT

- **New** ability to opt to include or exclude chartlets that have no data in the [Locations by Time report](#)
 - *Additional fixes and improvements:*
 - [Maxed Out Courses report](#) now defaults to sorting expanded sections by Section Number
 - Fixed issue where quick snapshots created from the "New" button temporarily appeared in the wrong project
 - A warning now appears when entering an invalid start or end time in the Settings > [Time Mappings](#) input screen
 - Ampersand characters no longer break filters
 - Various minor UI/UX improvements
 - *[Data Filters and Default Data Filters:](#)*
 - "Headcount" and "Date and Time" section headers and rearranged settings fall under their applicable headers
 - A "Saved" flag now shows when changes have been saved to the database
 - "Use Expected" and "Use Registered" radio dials have been added in place of the "Use Registered" checkbox
 - Fixed issue where the capacity range filters for "Max Capacity" even when a default layout capacity is selected under Data Filter > Locations > Capacity Range
 - *[Traffic Map report:](#)*
 - "Current Time" field no longer displays an inverted minute value
 - Report no longer shows an arbitrary unnamed building with an occupancy of one
 - *[Schedule Distribution report:](#)*
 - When "Show X Others" is selected, a pop-up modal displays in the right-hand section list
 - Right-hand section list now shows the start and end time of a selected time block
 - Section listing once again appears consistently when using the Safari browser
 - *[Supply and Demand report:](#)*
 - Breakpoint range is no longer off by one
 - Corrected issue where bars occasionally don't appear on the chart
-
