Default Project Security

Note that users will automatically have at least "Edit, Copy" rights on any projects they or any other user in their security group creates. Only security groups with access to X25 Analytics in [Groups](#) are shown below.

Group Name	Edit, Delete, Copy Select All	Edit, Copy Select All	View Only Select All	Not Visible Select All
Administrator - System (-1)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Administrator - Functional	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Administrator - South Campus	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Scheduler - Academics	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
User - Embedding	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Image: Default Security in X25 is controlled from the Settings area.

To set initial security options, go to the **Projects** view then use the **Default Security** link within the **Settings** list. You must do this as a member of the System Administrator (-1) group to make changes.

Security Reminder

You must do this as a member of the System Administrator (-1) group to make changes.

Levels of X25 Analytics Security

X25 provides three levels of security you can set after having given basic access to security groups in the [Series25 Group Administration](#) tool.

- Edit, Delete, Copy
- Edit, Copy
- View Only

Reminder: Default Security for Projects

Users will automatically have at least have "Edit, Copy" rights on any projects they or others in their security group create. You can change security per project in the [project settings](#).
