

08/25/2022 – X25 Analytics

Last Modified on 08/26/2022 10:39 am PDT

- New Functionality: [Snapshots](#) can now be moved from one project to another
- New report grouping options:
 - [Event Distribution report](#) can now be grouped by "College" and by "Meeting Pattern"
 - [Location Inventory report](#) can now be grouped by "All" and "Individual Room"
 - [Location Usage report](#) can now be grouped by "All" and "Individual Room"
- *Other Fixes and Improvements:*
 - In [Data Filters](#), when making a filter change that cannot be saved, the associated field now displays a red "Error" flag
 - In Data Filters, filter groups are now sorted into three columns instead of two, for better data visibility
 - In Data Filters, users can now enter the same value in both the "headcount" and "capacity" fields
 - In [Section Analytics](#), users can now see individual instructor's sections using the "Instructors" grouping in the Aggregated Sections report
 - Detailed error messages added to Section Analytics, replacing a general error message that was thrown when a report returns no data
 - UI consistency improvements to the display controls (radio buttons switched to dropdown menu) for various reports
 - UI improvements to the [Demand by Time](#) report "Scale by" options
 - Plus codes are now automatically converted to latitude/longitude behind the scenes to fix unexpected errors thrown when updating building locations in the [Traffic Map report](#)
 - Removed the transition animation when checking the Exclude Groups with no Utilization box in the [Locations by Time report](#)
 - The display options for the [Passing Times Traffic report](#) are now preserved (instead of refreshed) when the data filter is changed
 - Minor UI consistency fixes to the "All" bar in the Location Usage Report and Location Inventory Report
 - Updated Descriptive Text for the [Aggregated Enrollment report](#)
 - Event List and Locations List tabs now default to sorting alphabetically by name under Model > [Lists](#)
 - Updated date and time formatting to use four-digit years, two-digit months and days, and the preferred date order chosen in 25Live
