08/25/2022 - 25Live
Last Modified on 08/26/2022 8:40 am PDT

- New update: Event Quotas are now configured by user or organization, allowing admins to limit organization-specific quotas by location
- New field—Total Time—added to the Event Quota form, allowing admins to limit the total duration of occurrence time allotted to users or organizations
- *Additional Fixes and Improvements:*
    - Three new columns have added to the Event Quotas table: Total Time, Organizations, & Locations
    - Updates made to event quota warning messages in the event forms
    - Corrected save issues for new Tax Rates created in Pricing Settings > Pricing Set-Ups > Tax Schedules
    - Accessibility improvements to date pickers in System Settings
    - New upload warning in 25Live alerts users if the image they're uploading is too large (over 5 MB)
    - New error warns users that are copying an event type to update the name, in cases where the new event type name will match an existing one
    - Minor UI improvements in System Settings > Master Definitions > Event Types
    - Corrected underlying issue causing "Unable to create XML stream..." error when removing all existing notification policies from an event type
    - System no longer sends incorrect start/end dates—resulting in unexpected routing errors—when creating a new folder/cabinet
    - Re-added missing alert that warns users that they cannot masquerade as other admin users
