

11/17/2022 – X25 Analytics

Last Modified on 11/17/2022 7:17 pm PST

- In [Section Analytics](#), users can now filter by status codes to filter out canceled or pending sections (by customer request on [Feature Upvote](#) and in [customer webinars](#))
 - Multi-table reports are now more consistent and allow for users to drill down into more detailed section information
 - Updates to the [Passing Times Traffic report](#) now allow sampling for a single day and filtering for deviating occurrence patterns
 - Added "Usage Hours" column to [location tables](#) that display calculated total meeting hours plus passing time for all occurrences
 - Rows in the [Overview report within Section Analytics](#) now visually indicate users can click to expand
 - Resolved permissions issue where users who could create objects such as projects could not cancel/delete incomplete projects
 - Ensured the [Traffic Map report](#) returns results
 - Better keyboard navigation for improved accessibility
-
