11/17/2022 – 25Live

Last Modified on 12/06/2022 5:01 pm PST

- New - Bulk editing is now available on Task searches. New actions include:
    - Updating the "Respond by" date
    - Editing Comments
    - Adding an Assignee
    - Assigning/Denying objects

- New - Accessibility Improvements include the following:
    - Users are no longer able to navigate outside of the Welcome Message with keyboard control before closing the modal
    - Screen reader improvements for labels on the Days, Hours, and Minutes fields in the Event Form
    - The first info button is no longer skipped on the event form when using keyboard navigation
    - The info buttons on the event form now have unique labels

- *Other Fixes and Improvements:*
    - Close button added when bulk editing Locations Hours
    - Fixed backend issues preventing the Location Hours from updating when bulk editing locations
    - Inline editing the Scheduler field on an event no longer causes loading issues
    - Filter by Title and Filter by Type options added when searching for images from the Location Details page
    - Fixed issue where occasionally an event's Requirements field is unexpectedly missing
    - Clicking Save multiple times after creating a contact from the 25Live event form no longer creates duplicate contacts
    - Corrected Blackout Management behavior where creating an annual pattern would incorrectly create a monthly pattern
    - Restored the Requester variable when Event Save Emails are sent for Cancel requests
    - New ability to select an image type when uploading images from a Location Details page
    - Cabinets and cabinet types now have distinct icons in Event Type Hierarchy
    - The -1 (Unspecified) event type is once again hidden from the Event Type Hierarchy
    - Colors and contact information now display correctly in Dark Mode for the panel that pops up when hovering over a contact name
    - A "t.contact is undefined" error is no longer thrown when previewing a document in Document Management for cases where a contact role doesn't have a contact but associated contact variables are still being used
    - Corrected issue where occasionally duplicate fields would display on the Contact Details page after creating a contact record
    - Event Types, Cabinets, and Folders "Sort by" dropdown options have been replaced with buttons in Event Type Hierarchy > List View Removed "Sort by" label.

- Restored lit-up star on the Event Details pages of starred events
- Restored the ability to save a default report when editing an Event Type
- New warning in System Settings > Event Form Settings > Rule Settings when an Alert is entered that is over 512 characters
- Event Save emails are now triggered when contacts are added to tasks
