

## Archiving Terms in Eval25

Last Modified on 09/20/2023 5:26 pm PDT

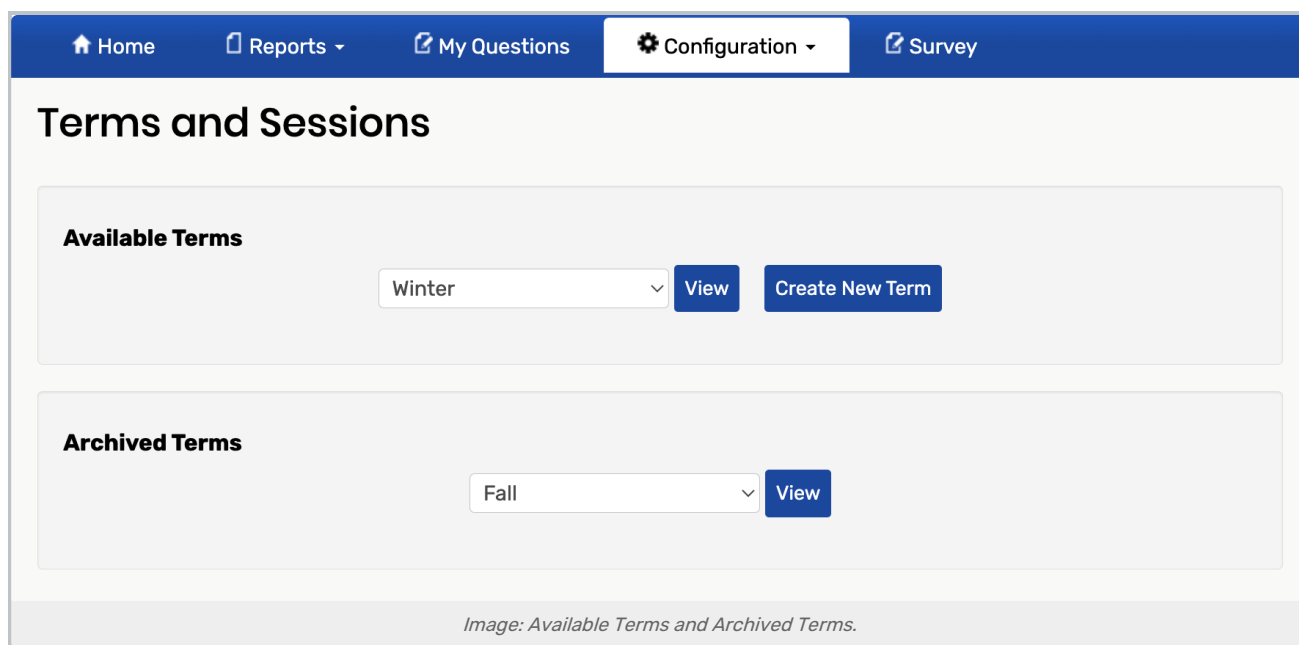

You can archive terms listed in Terms and Sessions. This can be particularly useful when you are working with test terms or want older terms to not be visible to users.

### Note

Terms that are archived will not be factored into any reports calculated by Eval25.

When you navigate to **Terms and Sessions** from the **Configuration** menu, you will see a section of **Available Terms** and a section of **Archived Terms** below it. If you have previously archived any terms, you can look through a dropdown list of these terms, and if needed, you can also remove them from the archive and make them available again.

## How to Archive a Term

### 1. Navigate to Terms and Sessions From the Configuration Menu

### 2. Select a Term

From the list of **Available Terms**, select a term you want to archive.

### 3. View and Edit

Click **view**. When the term is visible, click the gearbox option to the right of the term description. Then, click **Edit Term**.

4. Archive the Term

Locate and click the **Archived** check box to archive the term.
