Update Email Processing with DKIM and SPF for Eval25

Last Modified on 02/10/2024 2:37 pm PST

Email sent out from collegenet.com servers by the Eval25 system will have the "From" address that your institution designates, such as name@yourschool.edu. For our email servers to be trusted to send email on behalf of your school, your DNS servers will need to be updated.

For details, please see:

- Helping Ensure Delivery of Hosted Email Sent by CollegeNET

- Setting Up DKIM and SPF Records in DNS to Authorize CollegeNET to Send Emails
