

2022 – Eval25

Last Modified on 03/16/2023 10:43 am PDT

Eval25 Release 2022.10

In this release, we're excited to announce that What•Do•You•Think? is stepping ahead to become Eval25!

- Logos were changed to Eval25
- Mentions of WDYT and What•Do•You•Think? were changed to Eval25

We will keep you informed as we build more features and interactions between Series25 tools in the future.

Release 2022.04

What•Do•You•Think? Course Evaluation System published 2022.04 Release on April 20, 2022. Please read on for the full Release Notes below.

What•Do•You•Think? v2022.03 Release Notes

We're pleased to announce the What•Do•You•Think? Course Evaluation System v2022.04 Release which includes the new WebOptics™ Qualitative Analysis report with a qualitative comment search as well as several updates to internal libraries. The library changes should not affect your use of the What•Do•You•Think? Course Evaluation System.

WebOptics Qualitative Analysis Report

Our new WebOptics Qualitative Analysis report allows you to search qualitative comments and view a word cloud pulled from your qualitative comments in the results. Word clouds help visualize your responses by displaying the most used words in varying sizes. The more a specific word appears in your comments, the bigger it appears in the word cloud.

The WebOptics Qualitative Analysis report allows you to filter by term, school, department and instructor. Clicking on a word in the word cloud displays all comments using that word below the Search bar.

Qualitative Comment Search

Not only is the word cloud displayed, this release includes the new search feature for your qualitative comments. Using the search will display your results of every comment using that word, as well as the word cloud for visual representation, comparisons, and qualitative analysis. For more information and how to use this report, see our Help Center article, [WebOptics™ Qualitative Analysis report](#).

Library Updates

Library	Previous Version	Upgraded Version
org.springframework	4.3.1.RELEASE	5.3.18

Library	Previous Version	Upgraded Version
org.springframework.data	1.10.2.RELEASE	2.5.10
org.springframework.security	4.1.3.RELEASE	5.6.2
org.springframework.security.oauth	2.1.0.RELEASE	2.3.0.RELEASE
org.springframework.hateoas	0.21.0.RELEASE	1.2.0
org.hibernate	4.3.11.Final	5.2.18.Final
org.hibernate.validator	4.2.0.Final	6.0.20.Final
com.microsoft.sqlserver	4.2	10.2.0.jre8
org.apache.tomcat	8.5.5	8.5.78
10javax.servlet	3.1.0	4.0.1
11com.google.guava	19	25.1-jre
12javax.validation	1.0.0.GA	2.0.0.Final
13com.fasterxml.jackson	2.8.5	2.10.5
14org.apache.tiles	2.2.2	3.0.8
15junit	4.12	4.13.2

While you might not notice the library updates, we want you to be aware of recent improvements and would like to remind you to please contact us if you have any questions.

Please Note: Our current system is not in any danger or vulnerability as the recent reported vulnerability is related to java 9. However, we took this as an opportunity to upgrade our Libraries to better versions.

Thank you for your continued use of What•Do•You•Think? We hope these latest updates improve your experience and help you gather the most reliable data.

Release 2022.03

What•Do•You•Think? Course Evaluation System Version 2022.03 Released on 3/21/22.

What•Do•You•Think? v2022.03 Release Notes

We're pleased to announce the What•Do•You•Think? Course Evaluation System v2022.03 Release with updated and additional functionality. Find details about Version 2022.03 below, including a new Qualitative Sentiment Analysis Report, read-only terms, and on-going back-end improvements.

New Qualitative Sentiment Analysis Report

What•Do•You•Think?'s new Qualitative Sentiment Analysis Report provides additional scores for tone and sentiment to your open-ended questions.

Using this tool allows you to view a breakdown of scores, ratings, and filter the results to see comments that correspond to each for one term at a time. You can filter the question across the University, to different schools within the university, different departments within those schools, and even down to individual instructors.

Once the question is filtered, you can then compare the results against different schools, departments, or instructors.

You may export the results in any combinations of filters and comparisons using the Export button. This provides a .xlsx file broken down into different columns for the different results for each response.

This new Qualitative Sentiment Analysis Report comes with additional configuration options and robust reporting. For more information, see our Help Center article, [Qualitative Sentiment Analysis Report](#).

Terms and Sessions Read-only Permissions

You may now add Read-only Permissions to Terms. This user configuration allows you to grant additional permissions to certain users so they may view the Terms and Sessions page.

Note: This setting allows users to view Terms and Sessions page, however, editing functionality on that page has been removed.

For more information and instructions on how to set up this permission, see our Help Center article, [Adding Read-only Permissions to Terms](#).

Continued Maintenance & Enhancements

What•Do•You•Think? continued on-going back-end maintenance and enhancements to the user experience.

Thank you for your continued use of What•Do•You•Think? We hope these latest updates improve your experience and help you gather the most reliable data.
