03/16/2023 - Series25 Group Administration

Last Modified on 03/16/2023 3:58 pm PDT

- When adjusting the Event Security browser window size, the search results dropdown menu no longer gets cut off, obstructing the results

- Restored ability to use apostrophe characters in a keyword search

- Loading time improvements made when checking the **Select All** option in Event Security

- Corrected issue where occasionally configuring Location Security for more than 50 groups could result in an infinite loading wheel

- UI improvements made to the Assignment Policy Exceptions modal

- Fixed issue where occasionally adding a date exception to a location could remove an existing Assignment Window
