

03/23/2023 – 25Live

Last Modified on 04/27/2023 3:40 pm PDT

- New Feature – [Tiered Workflow](#) (also known as "chained" workflow") is an optional setting that automates task priority for each task connected to an event
- Table view added to System Settings > [Embedding](#)
- Table view added to System Settings > Pricing Settings > Pricing Set-Ups > [Tax Schedules](#)
- *Other Fixes and Improvements:*
 - Reduced spacing in the email signature styling that is set up in [User Settings](#)
 - Warning message added when users try saving an embedded configuration without a Session ID
 - Minor styling changes made to toggle buttons
 - Embedded Config **Item ID** field changed from a text field to a set of dropdown menus
 - Pre-defined searches titled "All Locations", "All Resources", and "All Organizations" have been added for use by (-1) System Administrators
 - Event search > [View and Edit Security](#) now exclusively pulls events into Group Administration (instead of events, folders, and cabinets)
 - Consistency improvements made to Cancel button behavior across 25Live
 - Tax rates now display as rounded to the nearest hundredth instead of the nearest tenth
 - Updated styling to the default event email template—such as the one used when selecting [Email Event Details](#)
 - Fixed issue where edits to the Exclude constraints on a cabinet/folder structure occasionally don't save as expected
 - Minor styling updates to Search Selector checkboxes
 - Removed unexpected editing ability for organization fields when Edit Mode is Off
 - Removed the Auto Open Help Message checkbox for the Affirmation item in [Event Form](#) configurations, as the message always displays
 - Scrollbars in search dropdown lists no longer disappear at various browser zoom percentages
 - Pre-save variables removed from [Document Management](#)
 - The Cancel button in System Settings > General Settings > [System Defaults](#) > Sign In Message now immediately reverts changes when selected
 - Adding or removing a breakpoint in System Settings > Search Settings > Locations will now display a "Success!" message
 - Corrected issue where opening the first folder in an [Event Hierarchy](#) cabinet/folder could unexpectedly collapse the parent
 - Restored the dropdown close functionality when inline editing Scheduler and Requester fields on an event
 - Styling improvements made to location address template variables
 - Long email signatures no longer fall to the bottom of the screen when editing them in [User Details](#)

- Corrected issue where occasionally removing a Tax Rate from a [Tax Schedule](#) could delete the schedule
 - Restored missing Add a Custom Attribute button when inline editing an event
 - Minor styling improvements made to Custom Attribute lists in the Event Form
 - Pre-defined searches now support the View and Edit Security option
 - Location calendars automatically refresh after selecting the Related Locations checkbox
-
