Spring 2023 - Series25 LYNX Interface Patches

Last Modified on 08/03/2023 9:44 am PDT

- Fixed the message displayed in the LYNX-UI for Ethos 403 forbidden errors
- New LYNX-APP files are available for customers with updates to the commons-text library used by the LYNX-APP to fix a security vulnerability *(Note: This update retains the same version number)*
- Prevented erroneous deletions by no longer checking a preference in all instances
- Ethos change detection is in place for customers that requested it. Please let your Series25 Account Manager know if you're interested
- Overlapping bound sections' headcounts are now included and summed when the "Head counts on bound sections are summed together" option is selected
- Import/Export Exams (Assessments) that use using the exams "Assessments" feature in Workday are ready for interested customers to request
- Exam Import/Export has been implemented for Workday
- Resolved issue where keyword searches were not returning locations reliably when working with translation rules
- Ensured exams get automatic headcount import changes
- Better method for collecting instructor data in Campus Solutions
