04/13/2023 – 25Live

Last Modified on 04/24/2023 2:52 pm PDT

- New - Schools that license Eval25 can now have an "Eval25 Location Satisfaction" setting enabled in their 25Live instance with help from their Account Manager. Instances with Eval25 enabled will now see:
    - An Eval25 Location Satisfaction logo on their events
    - A Location Satisfaction event attribute
    - Locations Searches that (optionally) display the average location evaluation percentage score in a new column

- Clicking "Pending" under the tiered workflow Task List now opens a modal that shows which tasks are blocking others

- *Other Fixes and Improvements:*
    - The Approve/Deny Checked task buttons in tiered workflow now remain inactive until task items have been checked
    - Conflict notifications in tiered workflow now display for conflicts are encountered while making task changes in bulk
    - Accessibility update: Users are now able to check conflict details in the Event Form using keyboard navigation
    - Fixed pagination issues on the Manage Related Events page that would prevent the correct number of search results from displaying when updating the event count
    - Users can no longer create duplicate resource inventory rows for the same resource
    - The Optimizer Effective Dating default has been switched from "12/31/2100" to the current date
    - Right-clicking on a location from the event occurrence list and navigating to List, Calendar, or Availability views will now consistently take users to the selected occurrence's associated date
    - Corrected issue where occasionally events that have both an organization and an event type task show up in the incorrect tiered workflow task section
    - Corrected issue where some variables display ampersands as "&" when using Event Save Email templates
    - Events with "(Private)" in the name are now prevented for events created using Express Scheduling
    - Restored deflagging of location and resource assignment tasks when using tiered workflow
    - Emailed Event Confirmations now consistently display names in "First Name Last Name" order
    - UI improvements made to the User Settings page when viewing on mobile devices
    - UI improvements made to the embedding settings when viewing on mobile devices
    - "Select All" button added to the Meeting Pattern Grid modal
    - Meeting Pattern grid rows that have dark backgrounds now have white text instead of black, for improved readability
    - Restored loading of starred locations in the Event Form
