

## 05/04/2023 – 25Live

Last Modified on 05/04/2023 3:45 pm PDT

- New [tiered workflow](#) feature is now available for all institutions after successful testing with a new progress bar and other improvements based on feedback
- [Inventory](#) end dates are now inclusive (end date is also the last effective date)
- New table [template variables](#) in [Document Management](#) allow users to set column widths and feature improved formatting for custom tables
- *Additional Fixes and Improvements*
  - The Schedule view in [Event Details](#) now defaults to the first date of the event
  - Resolved failure of generating a [cancel request](#) for an event when no assignee is available
  - Ensured [email templates](#) save changes correctly
  - Disallowed users to cancel their own [Express Scheduling](#) events that have already occurred
  - Better visual spacing in [Search](#) Bulk Editing views
  - If users use the "Copy Link" option under [Master Definitions](#) > *Images*, the link now includes full information for use in Publisher
  - Several [task](#) improvements:
    - Improved tasks to more reliably edit dates, always save correctly upon creation, and show all elements in the modal window
    - Tasks for resource assignments will now display the resource quantity, and tasks for specific objects will now include a link to the object's details
    - Event-related tasks now include a column with the event's current state
    - The task calendar view now includes event times when grouping by Event Start Date
  - Fixed incorrect display of resource quantity levels and stock levels
  - Improved icon in [dark mode](#) views
  - Addressed population of the view when using the "See when these locations are available" link from the [home dashboard](#) starred location widget
  - Ensured users can only select users from the "Scheduler" dropdown in the [Event Form](#) for improved consistency
  - The [Meeting Pattern Grid](#) feature now has better visibility of elements for improved accessibility and additional filtering options to help users better find the best-fit location
