Last Modified on 05/29/2023 9:21 pm PDT

- Added "Security Group" results column option when [searching for Contacts](#)
 - [Master Definitions](#) that include a "Usage" column will now also show a "Report" column that can run and export the "Master Definition Usage - Excel" [report](#)
 - New "Your starred searches" option to predefined list in [task search](#)
 - [Task calendar](#) improvements, including:
 - Event times displayed in the calendar view
 - Showing tasks and object details (such as locations) associated with an event for each occurrence
 - Users with the appropriate permissions can add additional organizations via [inline editing](#) on the Event Details page
 - *Additional Fixes and Improvements*
 - Better mobile device responsive views for search results and event task lists
 - Improved keyword searches with better results when searching for whole words
 - Fixed problem target mouse areas around Yes/No toggles in the [Event Form](#)
 - When sending [manual emails](#) using a template, ensured using 'object owner' will check the "Event Owner" checkbox to populate their email
 - Addressed issue displaying [custom attribute discrete options](#) with only numeric values in the Event Form or when inline editing
 - Prevented issue where some occurrences were cancelled while selecting locations in the Event Form for a multi-occurrence event
 - Resolved and clarified Freshbooks API error messages when [working with invoices](#)
 - Improved [Event Segment](#) summary modal window views
 - Removed "Note from (user)" message at the top of email confirmations
 - Adjusted element placement in the [Meeting Pattern Grid](#) to improve usability
 - Accessibility improvement for the Event Form "Close" button and the ability to clear searches using keyboard navigation
-
