

## 04/04/2024 – 25Live

- Added "Contact Roles" as targets in [Event Form rules](#), and clarified the display of the Scheduler in the Event Form presentation to mention rules-based contact options (based on Feature Upvote requests)
  - Start and end times were also added as Event Form rules criteria
  - Added new [User Settings > Display](#) setting that allows a user with appropriate permissions to select which type of tasks the [top navigation bar](#) indicator references
  - Re-introduced the "Select Today" calendar option in [Pricing > Pricing Date](#)
  - Administrators can now limit the number of reservation occurrences added to events from [embedded forms](#) by guest users (based on Feature Upvote requests)
  - Added option to "Select All" in the [Event Type Hierarchy](#) folder view using a keyboard shortcut
  - *Additional Fixes & Improvements*
    - Pre-event variables that don't change after an event save were removed from [Template Variables > Standard Event Variables](#)
    - Ensured embedded Event Forms don't display blank event save messages
    - Fixed issue where loading was delayed after selecting the "Save Partition Preferences" button when [bulk editing organization](#) partition preferences
    - Ensured event [searches](#) limited to "Recent and Future" reflect an accurate results list
    - Addressed display of search results showing abridged [master definition](#) items for users who do not have permissions to view unabridged items
    - Resolved display issue in the Event Type Hierarchy view after selecting a folder or cabinet type to edit then using the browser back button
    - Ensured [partition preferences](#) always save correctly when removing them
    - Fixed problem with creating events from the weekly Availability View when [masquerading](#) as another user
    - Improved display of task columns in the Event Details *Task List* view
    - The [Quick Search](#) section on the Home Dashboard view for the viewer seat has been adjusted to show the proper options when displayed on mobile devices
    - Visual improvements to availability views on mobile devices as well as better display of dropdown options
-
