

04/18/2024 – X25 Analytics

- Accessibility: A visual texture fill option has been added to charts where data points have exclusively been represented by different colors, to improve the experience of users who are unable to differentiate between colors, shades, or contrast
 - This change impacts [Event Distribution](#), [Class/Event Placement by Preferences](#), [Class/Event Placement by Room Capacity](#), and [Location Usage](#) reports, as well as four [Comparison Set reports](#) – Total Demand, Total Supply, Preference Satisfaction, and Room Usage
 - The ability to zoom into graphics has been added to all Comparison Set reports except Schedule Compliance and Rooms with High Utilization
 - Lock functionality has been added to Quick Snapshots
 - The option to lock a snapshot has been moved from the Edit modal to the [More Actions](#) dropdown
 - When a user opts to edit a Modeling snapshot, they are no longer directed to the same modal as is used for search-based snapshots
 - Modeling snapshots no longer display the Update button in the More Actions dropdown as they are not able to be updated
 - Improvements made to Metrics when zoomed in 200%
-
