

05/09/2024 – Series25 Group Administration

- Three settings under Configure > Security > Administrative Options have been split into two:
 - '10.0 Create, Edit and Copy Locations' has been split between '11.0 Create and Copy Locations' & '10.0 Edit Locations'
 - '11.0 Create, Edit and Copy Resources' has been split between '13.0 Create and Copy Resources' & '12.0 Edit Resources'
 - '13.0 Create, Edit and Copy Organizations' has been split between '16.0 Create and Copy Organizations' & '15.0 Edit Organizations'
 - Security settings that followed these have been renumbered
 - Searching for a specific location in Configure > Locations, before the default search loads, no longer returns rows of empty results
 - Accessibility: Level one headings have been added to:
 - Configure > Resource Security
 - Configure > Categories
 - Configure > System Tags
 - Dashboard page when multiple groups are selected
 - Accessibility: Improvements have been made to correctly reorder the header levels
 - Accessibility: Accessible names have been added to alert and dialog boxes
 - Accessibility: "Search for Group" on the Configure > Members page now has an accessible label
 - Accessibility: Corrected use of the autocomplete attribute
 - Accessibility: Toggles now have accessible labels
 - Accessibility: "Filter by Question" under Configure > Security can now be accessed through keyboard controls
 - Accessibility: Interactive control buttons are no longer nested on the Summary tab of Configure > Security
 - Accessibility: Buttons with chevron icons now have accessible labels
 - Accessibility: The home page now only has one main landmark
 - Accessibility: Multiple selection menus now have accessible labels
 - Accessibility: Color contrast improvements have added to various elements
-
