07/11/2024 - X25 Analytics

- Improvements made to the Top Organizations and Top Buildings calculations
- Users are now automatically authenticated into Feature Upvote when they click the Product Functionality link from the More menu
- Modeling functionality is now restricted to licensed users
- The hover functionality when interacting with the color ribbon on the Traffic Map report has now been switched out for a bar that users can click-and-drag
- The Location Usage report now allows users to see the sub-groups of each element in the selected group
- The Class/Event Placement by Room Capacity report now allows users to see the underlying section data that makes up each grouped chart
- Accessibility: Keyboard users can now access the slider on the Traffic Map color ribbon to adjust increment/decrement the time
- The More menu in Group Administration is now consistent with other Series25 tools
