

08/08/2024 – 25Live

- New – Event Affirmations and Event States can now be selected as an [Event Form Rule](#) sources
- New – For schools that have a [StandOut Classroom](#) license, the StandOut Classroom location can now be utilized on a 25Live event
- *Other Fixes and Improvements:*
 - Numerous updates have been made the look of the [Meeting Pattern Grid](#)
 - If two unbound events that have overlapping dates in the Meeting Pattern Grid are moved to an overlapping position, the user will receive a warning
 - Additionally, if the user tries to send those events to the Optimizer, they will receive a double booking error
 - Pairs of bound events—with any type of binding—will move with one another when clicking and dragging events on the Meeting Pattern Grid
 - Improvements made to zoom functionality on the Meeting Pattern Grid
 - Fixed issue where scheduled emails would not always pick up changes to the event details if those changes did not trigger the scenario itself
 - Multi-value custom attributes are now easier to read when previewing them in the event form, Document Management, Event Save Email scenarios, and Event Save Email templates
 - Restored email sending functionality for Event Save Email scenarios that rely on the event's cancellation as the trigger
 - The Request Cancellation button on Event Details pages no longer displays if the cancellation request has already been made
 - Removed the Edit Mode toggle on Event Details page from view for users that don't have inline editing permissions
 - The email text boxes in More Actions > Email Event can now be resized vertically—not just diagonally and horizontally
 - Improved the warning message that users may see when they try cancelling a task without the correct permissions
 - Fixed issue where the locations/resources that were previously selected in Event Form Rules would not appear to be selected if there were more than 100 of them
 - A Success message now displays after bulk editing location buildings
 - Fixed issue where users with override permissions could not save changes to an event that took place within blackout hours if the location panel was hidden from the event form
 - A new Order column has been added to the [Categories](#), [Requirements](#), and [Roles](#) sections of the Master Definitions, which allows keyboard users to enter a number into an input to update the item order. A Usage modal has been added to the Categories, Requirements, and Roles sections of the Master Definitions
 - Improvements made to search results when searching for a meeting pattern
 - Adjusted the placement of the task list Add Assignees modal on the user interface so that it is not cropped from view

- Fixed issue where unsaved changes were not included in Event Save Email scenario previews
 - A warning message will now appear if a user is attempting to assign a To Do task to a user with insufficient permissions
 - Fixed issue where adjustments made to a single occurrence via the Occurrence View on standard pricing would be applied to all occurrences assigned to a set
 - Force deleting a custom attribute will now remove it from existing Event Form Rules
 - *Patch 08/13/2024:*
 - 7 Point Solutions payment processing integration is now open to all instances
 - Fixed issue where To Do tasks tied to Event Save Email scenarios would not be generated as expected
 - Changing the time on rate group formulas no longer results in the field going blank
 - Fixed unexpected "End time must be after start time" error that could pop up after changing a rate schedule
-
