

## 08/15/2024 – X25 Analytics

- Design changes have been made to the layout of the [Metrics](#) page
  - The Schedule Distribution report now loads top down instead of bottom up
  - The item order in “Group By” dropdown menus are now consistent across all reports
  - In [Modeling](#), transforms are now applied prior to each individual simulation run, rather than prior to the entire simulation
  - *Traffic Map Report Updates:*
    - Users will now be prompted to re-simulate the [Traffic Map report](#) if the Data Filter is changed while they are viewing the report
    - Improved error messaging added when no walking path can be found to/from a building address
    - The report now detects and omits buildings that are more than five miles away
    - Users will now encounter an error if they run the Traffic Map simulation when the address/path data is empty
    - Outlier data points are now better handled
    - *Change Addresses Modal Updates:*
      - The Traffic Map report now sorts buildings alphabetically in the Change Addresses modal
      - Updated the Help documentation link
      - Building addresses are now better displayed
      - Buildings that were setup in 25Live are no longer editable in the modal
  - Accessibility - [Treemaps](#) now have improved contrast between a tile's color and the associated text color
  - Accessibility: Zoom functionality in the Room vs Seat Utilization, Location Usage, Class/Event Placement by Preferences, and Supply and Demand reports can now be accessed by keyboard users
  - *08/19/2024 Patch* - Ensured the bottom two chartlets display properly on data filter change in Metrics
-
