

08/29/2024 – 25Live

Note: Feature Upvote Works!

Many of the issues in each release are based on your customer requests on the Series25 Feature Upvote site.

[Learn About Using Series25 Feature Upvote Customer Feedback Boards](#)

- Added new [template variables](#) for document management to display additional tabled information, for organization roles, and corrected the display order of variables
- You can now add rich text/HTML in [Event Form Rules](#) alerts
- Added new source for event form rules
- In Event Form Configuration, administrators can now choose to disable rules from running
- In conjunction with added [permissions in Series25 Group Administration](#) :
 - Users can now be prevented from seeing the [Event Details](#) Audit Trail
 - Separated the View permissions in [Event Form Configurations](#) from the ability to edit them
- *Additional Fixes and Improvements*
 - You can now link to more sub-tabs within [system settings](#)
 - Improved list ordering within [Master Definitions](#), made the drag-and-drop action smoother, and improved modal displays
 - Tightened listing of public location searches for groups without permission to see them
 - Added an alert in the [Meeting Pattern Grid](#) when moving a course section to a location that is too small
 - Made sure an error won't prevent copying a [segmented event](#) if it's using an inactive custom attribute
 - Fixed issue where layout options sometimes didn't appear when making changes too quickly
 - Improved audit trail message wording for bulk edit actions
 - Ensured permissions were applied correctly when switching roles after [masquerading](#)
 - Addressed problem with the Location Scheduler not updating on event creation when changing the location
 - Emails scheduled via [scenarios](#) are now read-only when viewed
 - Corrected display of overflowing text in [Pricing](#) summaries, headers in different application areas that wrapped mid-word, and column alignment in Pricing [rate schedules](#)
 - Prevented reports from being automatically selected when sending email templates from the [More Actions menu in the Event Details view](#) and removed some invalid report options
 - 25Live now allows naming a To Do template the same as an email template and does not display erroneous errors when naming templates
 - Changed ordering of resource search dropdown choice for Recommended Resources
 - Made the "Done" button unnecessary when selecting multiple custom attributes, enabling auto-saving

- Ensured the search option bar (to change between Recent and Future events) displays even if the [search returned no results](#)
 - Improved display and formatting of date/time when previewing an event form
 - Resolved errors when [canceling an event](#), when editing some events, when changing an event repeating pattern, and when selecting days for weekly availability views
 - Accessibility improvement for keyboard users working with multi-select dropdown
 - *09/06/2024 Patch*
 - Ensured customers are able to save new partition preferences successfully
 - Fixed issue with new alert in the [Meeting Pattern Grid](#) when moving a course section to a location that is too small
-
