

09/26/2024 – StandOut Classroom

- AI assistance has been added to pull in definitions of transcript words when those words aren't defined in the dictionary library
 - Fixed background issue that could cause an unexpected "Cannot read properties..." error to pop up when viewing a message draft
 - Picture-in-picture, present screen, and virtual background features that aren't functional on mobile are now hidden from mobile users
 - Fixed resolution issue that could prevent video conferencing backgrounds and the picture-in-picture feature from functioning in Safari browsers
 - Various improvements have been added to video conferencing including video ratio consistency and the ability to flip user cameras
 - Video conference user lists are now paginated
 - Accessibility: Several buttons are now announced by screen readers
 - Fixed issue where video recordings wouldn't finish processing if recorded in Google Chrome or browsers that use chromium
 - Added batch translating, so that videos will no longer encounter translation errors for long video transcripts
 - A dialogue box asking users if they want to save now pops up when users try to close a message draft
-
