Summer/Fall 2024 – Series25 LYNX Interface

- Fixed issue where some users were receiving hourly APP NOT RUNNING errors.

- Restored and updated email notification behavior for APP NOT RUNNING errors, which are sent once to any party that are configured to receive email in the LYNX configurations.

- Improvement added to prevent deadlocks by reattempting during the history loading process when data is initialized.

- Anthology instances can now utilize change detection.

- Campus Solutions instances can now configure their LYNX settings to import Class Types as event custom attributes via Event Settings > Specify SIS Data Elements.

- Fixed background issue that unexpectedly prevented reference data initializations from completing in Ethos instances (in special cases).

- The Include Section Instructors setting in Organization and Contact Settings now allows users to choose from two more options: "Include. instructors as event contact roles in 25Live and not as description text" & "Do NOT include section instructors".

- Fixed issue in Workday instances that could cause a false error stating that null values cannot be inserted into the. Student_Course_Tag_Category_WID column on the Student_Course_Tag_hist table.

- The Add Location Requirements setting in the Location Settings is now named Include Location Requirements.

- A SIS Location Requirements Tag Category option has been added to Location Settings > Include Location Requirements, for Workday instances.
