Feature Upvote Works!

Many of the issues in each release are based on your customer requests on the Series25 Feature Upvote site. Go to a Series25 application, log in, then navigate from the **Product Feedback** link in the **More** menu. You will be automatically authenticated.

[Learn About Using Series25 Feature Upvote Customer Feedback Boards](#)

- Users can now toggle Pricing to default to the [Payment mode](#), and the setting will remain "sticky"
- Added more [System Tags](#) options, including:
 - Layouts
 - Requirements
 - Event Form Configuration
- New field on [invoices](#) for editing the invoice number for all potential billed organizations
- Added ability to lock a [Pricing](#) set with an option to refresh on demand
- Two new columns have been added to event [search results](#), Weekly Pattern and Weekly Frequency, for events with weekly or bi-weekly [repeat patterns](#)
- Occurrences can now be moved to different invoices for better flexibility when deleting invoices
- Large fields in the [Event Details view](#) can now be collapsed/expanded
- Added description field to custom document template lists
- New [Document Management](#) variables:
 - Added building variable for the event listing and reservation listing scopes
 - Made total tax variables available in multiple scopes
 - Variables related to custom attributes added to the invoice details payment Excel scope
 - New variables for bill item name and type
 - Occurrence counts can be used now in Excel scoped documents
- **Additional Improvements and Fixes:**
 - Users on devices that display mouse-over hover information can now see headcount in the [Availability Daily view](#)
 - Limited payment invoice reports by organization to facilitate an ability to manage invoices separately
 - [Occurrence Editing](#) improvements:
 - When creating a new event segment using inline editing from the Occurrences tab, the segment name can now be configured as well as the date/time
 - Ensured that "Add Resources" always displays the correct available quantity if another event has changed resources for the same date/time

- Fixed conflict displays for "Add Resources"
 - Corrected issue that occurred when a user tried to add a location on an event that is already assigned to another event where overlap exists, and the location displayed as available
 - Removed unnecessary alerts that showed when quickly adding objects
 - Ensured that "Add Location" is always available when it should be
 - *Reminder: If you would like to beta test inline editing for event occurrences, contact your Account Manager (series25implementation@collegenet.com).*
- Fixed issue with deleting [event segments](#)
 - Resolved error that occurred when adjusting Pricing on an invoice that only has requirements
 - Addressed problem when the Pricing Date is adjusted on the Standard Event Pricing after pricing set creation and changes didn't properly show
 - Prevented erroneous selection of additional rows that use the same location/resource as the intentionally selected location/resource under [User Activity](#) > *Pending Locations/Resources*
 - Resolved error about an invalid or unexpected token when using [Email Template](#) conditions for locations or resources
 - Improved visual application elements such as making editing links larger where needed
 - Performance improvements for better efficiency and speed in the application
-
