

## 01/23/2025 – 25Live

- [Inline editing on the Occurrences](#) tab improvements:
  - Users can now create overlapping occurrences when inline editing events
  - Adding locations via inline edit allows locations to be marked as shared
  - Added permission for users to inline edit via the Occurrences tab
  - New ability to edit occurrence-level comments on a given occurrence
  - Ensured changes to date/time or location/resource assignments display when finished, and that the event Audit Trail is properly updated
- Added ability for event requirements added via [bulk editing](#) to generate the task for that requirement's notification policy
- Bulk event editing will also now allow selection of payment invoice reports when using the Add/Remove Reports option
- [Payment Mode](#) improvements to better display subtotal adjustments to reflect payments by converting existing standard pricing to a single invoice
- Search-based, read-only display available in the [Meeting Pattern Grid](#)
- *Additional Fixes and Improvements*
  - The [Express Scheduling chatbot](#) now has improved context memory
  - Better readability for large text fields in the event details view
  - The Occurrence tab view has been condensed for more efficient viewing
  - Improved the visual distinction between segments in when working with [Event Segments](#), and made the controls more obvious when adding and deleting segments
  - Added messaging to better communicate when an error in a template cause the preview to fail
  - Prevented issue where responding "No" when changing an [event form configuration](#) didn't change your dropdown selection appropriately
  - Fixed looping error that occurred when responding to fields triggered by Event Form rules
  - Ensured conditional [Event Form rules](#) added via custom attributes appear in the proper order
  - Resolved issue when removing assignments from an occurrence then changing the additional [post-event/takedown times](#), and the time wasn't changed
  - Ensured HTML is rendered correctly in event comments
  - Addressed problem with [To Do task](#) due dates not matching settings for number of days before or after
  - Fixed problem when logging out of [Masquerade](#) mode didn't properly refresh to your native user
  - Improvements to views when choosing an organization as well as the appearance of modal windows when adding locations or resources
  - Behind the scenes [audit trail](#) improvements
- [25Live Outlook Calendar Integration](#):
  - Resolved duplicate transaction error when exporting events from Outlook

- Improved error messaging
  - *01/24/25 Patch:*
    - Fixed the layout not displaying when Edit Mode was off in the Occurrences tab
    - Resolved errors in the Pricing tab and for inline editing in the Occurrences tab
-
