Feature Upvote Works!

Many of the issues in each release are based on your customer requests on the Series25 Feature Upvote site. Go to a Series25 application, log in, then navigate from the **Product Feedback** link in the **More** menu. You will be automatically authenticated.

[Learn About Using Series25 Feature Upvote Customer Feedback Boards](#)

- New beta test of a schedule-only version of the [Meeting Pattern Grid](#) can be used to review the times and meeting patterns of sections
 - If you're interested in providing feedback and would like a preview added to your test environment, please contact series25implementation@collegenet.com
 - Also added new security [permission within Series25 Group Administration](#), "6.0 Access to Academic Grids" for the new, beta Meeting Pattern Grid mode
- Additional ability to preview location layout images on selected layouts within the [Event Form](#)
- Users can now be removed from event tasks, including by using [bulk editing](#)
- Within the [Event Details view](#) in *More Actions > Print Reports > Events*, users can now choose an organization
- The [AI chatbot option in Express Scheduling](#) can now be given a custom name
- *Other Fixes and Improvements*
 - Occurrence tab improvements in Event Details:
 - [Inline editing](#) now includes the Event State options Override, Exception, and Warning
 - More efficient layout when creating an invoice
 - Added display of the total number of occurrences
 - Improved placement of Separated view button within inline editing
 - Fixed issue where bulk resource assignment quantities were not reflected
 - Resolved viewing permission issue with locations marked as private
 - Users can now count occurrences in the Payments Standard mode invoice conversion as billed
 - "Pre-" variables are now available in [Document Management](#) when users attach documents to templates
 - Now users can reactivate or deactivate a [folder or cabinet](#) type (if they don't contain folders)
 - The event [Audit Trail](#) will now show the organization name rather than the org ID
 - Added new "Payment Status" and "Payment Date" options when converting an adjustment to a payment in standard invoice [payments](#) conversion
 - Clarified name of new invoice created upon toggling to Payment Mode if there is an existing Standard Mode invoice
 - Adding a new [layout image or diagram to a location](#) no longer defaults it to be the default image
 - Occurrences with a "Warning" exception will no longer display with a strike line through the text

- Improved messaging when encountering an [assignment policy](#) exception when creation an event
- Ensured [search button](#) options don't overlap next to the entry field
- Fixed problem on the Event Details Task page where the option to sort tasks by "Only Assigned to You" did not work
- Resolved the Location/Resource filter sometimes not displaying in the Edit Preferences modal view of Event Details, and ensured no content inappropriately overlays with one another
- When creating a draft, addressed [Event State](#) dropdown not maintaining the occurrence state when changed
- Ensured invoice payment variables show in [Document Management](#)
- Better error messaging with details when deleting a [rate group](#) that is in use
- *02/18/2025 Patch -*
 - Ensured the primary organization is set automatically when Event Form rules and configuration are properly set up
 - Resolved errors when fetching certain types of data
