

## 03/06/2025 – 25Live

- New – Non-Invoiced Billing section in the Payments view of event pricing shows all items that are not connected to invoices.
- New – Users can now return events with any file attached or a specific file attached when utilizing the advanced search mode
- New – Has Additional Time has been added as an Event Form Rule source.
- New – A Set Additional Time target has been added to the Event Form Rules.
- New – Event Form Rules can now use the combination of a location and layout in the source.
- *Other Fixes and Improvements:*
  - Fixed issue where event occurrence tabs occasionally displayed duplicate section of the date and time information.
  - Restored the ability for users with location assignment policy override rights to request locations that fall into a Not Requestable Assignment Window.
  - Users are no longer prevented from adjusting the date and time of an occurrence via inline editing.
  - Optional requirements added through Event Form Rules are no longer automatically checkmarked.
  - Add Locations and Add Resources buttons are now disabled for occurrences that are in the Exception state when inline editing occurrences
  - Minor display improvements added to Event Save Email templates.
  - The Event Listing – Excel scope in Document Management now includes Requirement Select, Requirement Quantity, and Requirement Comment variables.
  - Fixed issue where clicking the Select Organizations button from an event's Details tab would post an update to the event's audit trail, even when no changes were saved.
  - When editing an event, selecting the organization that is currently attached to an event from the Search organizations dropdown no longer posts an update to the event's audit trail.
  - Fixed scrolling issues that could hinder visibility in the Event List popup on embedded 25Live calendars.
  - Occurrence start and end times are now visible in the Set For All section of event Occurrence tabs when inline editing.
  - Removed Success alerts from occurrence inline editing for interface consistency.
  - Improvements made to the Schedule Only Academic Grid types (beta).
  - Updated occurrence inline editing to allow editing of overlapping occurrences (as is already the case in the event form).
  - Fixed issue where users would encounter a blank screen or error if they had previewed or saved an event with multiple segments before a segment was selected.
  - Date and Time, Categories, Requirements, and Publish to Calendar data is no longer hidden on events for users that have View only rights to those sections in Event Form Configurations > Config Settings.
  - Users can now copy segments on events that don't repeat and have occurrences on different dates.
  - A new custom attribute has been added to 25Live that indicates if a LYNX section has been paused.
