

## 04/10/2025 – X25 Analytics

- Now you can [embed even more X25 reports](#) in your website(s)
  - New options are now available when [defining Standard Schedules](#), including the ability to use an existing standard schedule as your source criteria and the option to apply a data filter to the source criteria
  - Made [reports](#) more readable with enlarged axes
  - Added "Custom Creation" and "Existing Time Map" options to the "Add Mappings From" dropdown menu when creating a [Time Mapping](#)
  - Public searches from 25Live are available, and users can limit their view to only their searches during [snapshot creation](#)
  - Removed the "LYNX Instance Name" field from an exported report when using Section Analytics
  - Addressed non-functioning button when embedding a Section Analytics report
  - Fixed intermittent report failures for Event Distribution and Location Inventory reports and ensured Demand by Time report output doesn't get corrupted when using as an embedded report
  - Resolved issue with the scrollable region of image previews in the Passing Times Traffic report to ensure keyboard access
  - *04/17/2025 - Patch:*
    - Ensured Expected Headcount isn't used when unchecked
    - Fixed issue with old simulation data that couldn't be unchecked
-
