

08/28/2025 – X25 Analytics

- A new [Shared Reports](#) page allows user to review and edit their public report information.
 - The Room vs. Seat Utilization report can now be [embedded](#) into your website.
 - *Other Improvements and Fixes:*
 - Users can now review and edit shared reports.
 - Fixed issue where entering a Min Fill Ratio over 1 when using Modeling in X25 Analytics to set up a new simulation resulted in an unsuccessful save that incorrectly appeared successful.
 - Users now get an error message when trying to save a shared report that uses unsupported special characters in the name.
 - Minor improvements have been made to zoom behavior when switching from Zoom mode to another mode through a report's configurations.
 - Styling improvements have been made to the Traffic Map report to ensure that the blue occupancy bubbles that display over building squares are correctly aligned.
 - Error message added to Time Mapping to indicate that the entry cannot be saved in cases where users use the same source as an existing mapping.
 - Several styling and user experience improvements have been made to the Demand By Time report including (but not limited to) zoom functionality and sorting improvements and the addition of an Order By field, range checks based on input from min and max fields, and a second legend at the bottom of the chart.
 - Global values are now displayed by default in the Modeling fields: Min Fill Ratio, Default Headcount, and Time Padding.
-
