09/18/2025 - X25 Analytics

- Lists in Modeling can now be quickly filtered using keywords and value ranges

- The Demand by Time and Locations by Time reports can now be used in the multiple display mode within Comparison Sets when viewing by Reports

- Added a display option to the Standard Schedules and Time Mappings views that allows users to format meeting patterns to show the days of the week first

- Added the Location Inventory report as an embedded report option

- Fixed an error displayed with public links to shared reports, and corrected a page load issue after deleting reports

- Ensured that when buildings are removed from the Traffic Map report, the report graphics properly reflect the change

- Prevented the "X25 Building" and "Building" attributes from showing as two different buildings when they use the same name *(Note: use of "Building" is preferred)*

- Resolved issue where the "Critical Time Room Usage" report in Comparison Sets lacked scroll bars

- Made sure all correct objects are selected when using the Lists page for Modeling

- Improved accessibility labeling of report elements

- *09/23/2025 Patch:*

    - Fixed issue where users with access to *Tool Access >* "3.0 Access to X25 Analytics Tool" = Yes in Series25 Group Administration) but did not have "3.1 Administrative Access to X25 Analytics" = Yes were unable to adjust headcount-related data filters
