

10/16/2025 – X25 Analytics

- Standard schedules can now be created via the import of a [spreadsheet of meeting patterns](#)
 - The Supply and Demand and Passing Times Traffic reports can now be [embedded into your website](#).
 - *Other Fixes and Improvements:*
 - Fixed issue where the Term Code column had missing values on the Aggregated Enrollment report when setting the Aggregated by dropdown to Terms in Section Analytics.
 - Display improvements have been made to the Schedule Distribution report when filtering.
 - Adjusted the Passing Time Traffic volume to no longer count students exiting a room (only entering).
 - Demand By Time report chartlets with no data no longer display an unexpected green, horizontal line across the middle.
 - Fixed issue where the count represented inside the parentheses of each Demand By Time chart did not update when changing the Calculate Demand By setting from Events to Meetings to Headcount.
 - Selecting Fit to Page in the Locations by Time and Demand by Time reports no longer reduces chartlet sizes.
 - Styling updates have been made to the Passing Times Traffic report.
 - Styling updates have been made to the Class/Event Placement by Room Capacity report, including the addition of a second report legend below the report.
 - Users with User Settings > Display > Time Display set to a 12 hour clock no longer encounter an error where the event list start time could be limited to the start time entered (rather than the entire start to end range).
 - The behavior of the Alter Partitions transform in Modeling has been changed – selection defaults to the first partition, and if the dataset contains no partitions this transform will be grayed out.
-
