

## 11/13/2025 – 25Live

- The new [Manage Waitlist](#) feature has been refined
    - Added easier-to-read columns for waiting requests in the queue
    - You can now hide conflicting requests when finding a location on the event form
    - Added the ability to approve tasks in a group of requests without denying all other waiting requests
    - Shared locations appropriately don't display as waiting/conflicts
    - Conflicting requests that are waiting are now displayed in a modal window, showing the status with a link to the location's Availability (Weekly) view
  - [Document Management](#) Improvements
    - New [subreport](#) templates added to make creating these reusable reporting pieces easier
    - A new link allows you to easily access and edit subreports from a document's settings (while being mindful that subreports may be used in other reports as well)
    - Added a new Resource Instructions [variable](#) for Document Management within the Occurrences by Date scope, and also added more details to the Invoice Details (Payment) Excel scope
  - A different ["Welcome" message](#) can now be displayed per security group (configured in the [Series25 Group Administration](#) tool)
  - Within *Pricing > Pricing Mode > Payment*, you can now change the [invoice](#) name (limited to 80 characters) as well as change the invoice display order using drag-and-drop controls (including the ability to save the sort order)
  - [Availability grids](#) can now be opened to a specific date instead of only to the current date
  - Ensured multiple same-day requests that don't overlap aren't erroneously marked as conflicting
  - Fixed an error that didn't display when trying to create a calendar named the same as an existing calendar
  - Tightened security to not allow a user to see a "Go To Location" link if they cannot view the location
  - Resolved issues when editing [Blackout](#) profiles that contained special characters in the name
  - Addressed an incorrect permissions error when editing [system tags](#)
  - Prevented duplicate confirmation emails when changes were made simultaneously to an event
  - Ensured the correct open/close hours always show for locations within the daily availability grid views
  - Improved display of contact roles
  - Improved accessibility for the contrast of disabled buttons for low vision users
-
