

11/13/2025 – X25 Analytics

- All project reports and section analytic reports are now [embeddable](#)
 - *Other Fixes and Improvements:*
 - Capacity breakpoint functionality for the Location Usage report has been restored
 - Enrollment breakpoint functionality for the Class/Event Placement by Preferences report has been restored
 - The chart label under Metrics > Largest Department now appropriately updates once a filter has changed
 - A profile column has been added to event tables for all new snapshots
 - Fixed issue where a data filter start/end time could be saved incorrectly if it fell within the critical range in Projects > Data Filters
 - Styling improvements have been made to the Passing Times Traffic report to prevent chart arrows from overlapping the x-axis
 - Times displayed in modeling lists no longer show time units smaller than hours and minutes for Firefox users
 - Lists within the Transforms section of Modeling can now be sorted and re-ordered more intuitively
 - Data Filters now include the option to omit Exam, Makeup, and Conversion Date profiles
 - The Location Usage report now includes the option to dig down into subgroups for various categories
-
