> **Learn About Using Series25 Feature Upvote Customer Feedback Boards**

- Added new permission in Series25 Group Administration, *Basic > 1.1 Copy Events*, to allow finer control over permissions to copy events
- Made user interface improvements in the new waitlist features, including making it easier to see multiple tasks with the same order number and indicating tasks that may not be actionable
- Instructions can be included sooner when adding locations and resources inline within the occurrences tab
- If adding a contact without selecting a role, a default will now be selected
- When deleting master definitions, users will now be required to confirm their action
- Errors in email templates are now shown as soon as they are detected, allowing for faster, easier correction before utilization
- Made sure the progress bar correctly displays as completed when viewing tiered workflow
- Fixed issue where SeriesQL didn't properly evaluate search terms for some location and resource searches
- Resolved a scrolling problem in Document Management when viewing a preview
- Ensured correct colors are displayed on status/action buttons within location and resource searches in the Event Form
- Addressed a problem with some events using segments failing to load the utilized email templates
- Fixed a problem firing all to-do task templates when there were six or more email scenarios
- Ensured related events can be sorted by Start Date
- Fixed visual overlap when previewing an attached document in the Event Form
- Continued upgrading background code for performance improvements
