

12/11/2025 – X25 Analytics

- [Embedded Section Analytics](#) aggregate reports now allow you to group data by a single data point (also included in Excel output)
 - Added inline editing and copying to [Standard Schedules](#) and ensured the time display matches the user's chosen mode
 - The Room Usage overlay report in [Comparison Sets](#) now includes subgrouping
 - Improved and extended Excel output for Section Analytics reports to include a title summary page with report parameters
 - Ensured the column heading sorting feature works correctly when reviewing reports in Section Analytics
 - Fixed issue in [Data Filters](#) where erroneous critical ranges were saved
 - Addressed a problem with capturing events starting at midnight in [Quick Snapshots](#)
 - Resolved a missing or disabled dropdown selections for Total Supply and Total Demand in Comparison Sets
 - Continued background code improvements that include small refinements to user interface controls in many places
-
