

01/15/2026 – X25 Analytics

- Added [Waitlist](#) data to select [Section Analytics](#) reports
 - *Section Analytics Improvements*
 - The [Meeting Pattern Usage](#) report can now be grouped by a single data point
 - Estimated head count (EHC), registered head count (RHC), and Fill Ratio columns were added to the [Maxed Out Courses](#) report
 - Profile information was integrated into the "Generate List" output for Modeling and [Treemaps](#), as well as Lists in [Modeling](#)
 - UI improvements made in the [Traffic Map](#) report
 - Improved legend key in [Comparison Sets](#) overlay charts
 - Fixed issue with a disappearing radio button in Section Analytics
 - Ensured events sort properly in lists views when using column headings
 - Resolved problem with the Traffic Map report loading
 - Matched underlying label text to elements in the [Event Distribution](#) report
 - Addressed incorrect count for bound events issue in the Event table
 - Ensured embedded [Meeting Pattern Usage](#) and [Non-Compliant Meeting Pattern](#) reports populate correctly in previews
 - *01/29/2025 Patch -*
 - When creating two data filters, prevented changes to the first from also changing the second filter
-
