

## 03/12/2026 – X25 Analytics

- [Embedded Reports](#)
    - You can now embed [Comparison Sets](#)
    - Now allowing additional fields to be configured to be dynamic during configuration creation
    - Added a code snippet to the preview
    - When creating a new embedded report, new validation checks for data ranges are now in place, as well as default pre-set data
    - Improvements were made to make the workflow more efficient, and the *Save* buttons clearer
  - When adding patterns to a [Standard Schedule](#) from an existing snapshot, the data filter now omits additional time to reflect the true start and end times of the sections
  - Adjusted the display order of the options in the [Schedule Distribution](#) report to add importance to the *Critical Bound Section* setting
  - Fixed a problem with embedding the [Location Usage](#) report and trying to select sizing
  - Resolved the erroneous display of non-compliant events within Comparison Sets after choosing *Demand Scheduled in Critical Time*
  - Ensured unusual shading behavior doesn't occur in the [Demand By Time](#) report when choosing to schedule and shade for compliance
  - Fixed false appearance of a broken report when using X25 with an embedded [Non-compliant Meeting Patterns](#) report, and the "Choose Columns" combo box sometimes expanded underneath the embedding page
  - *03/19/2026 Patch:*
    - Ensured users can create [snapshots](#) for large amounts of data
    - Fixed a loading issue that occurred when selecting filters for [Section Analytics](#)
-
